01. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

This work plan describes tasks to update the Monterey Peninsula, Carmel Bay, and South Monterey Bay IRWM Plan to meet IRWM Program Guidelines and includes tasks by several stakeholder groups to improve plans to address four of the five regional priorities previously established. In addition to work to meet Guidelines, other tasks are widespread geographically and include: ??? Exhibit A-1 An update to the 18 sq. mi. Canyon Del Rey watershed drainage plan completed in 1977. Flooding and bank erosion along the Hwy 68/Hwy 218 corridor and sedimentation of the two lakes at the terminus of the watershed are primary issues. ??? Exhibit A-2 Development of a salt and nutrient management plan for the Seaside Groundwater Basin. Several water supply projects involving extraction of a variety of input sources are being considered for implementation in the basin. ??? Exhibit A-3 Assessment of steelhead passage barriers in the Carmel River watershed. The assessment includes private property owner outreach, field assessment, prioritization of barriers to be removed, and recommendations for modifications. ??? Exhibit A-4a Development of a GIS, database management, and communication tools for stakeholders and others. Primary goals are to integrate projects and stakeholder input directly into the IRWM Plan and provide tools for meaningful feedback. ??? Exhibit A-4b Development of a Document Management System portal to use with a GIS tools. Software will be developed for use in updating the IRWM Plan and to provide stakeholders with web-based tools to improve data management. ??? Exhibit A-5 Inter-regional Coordination. This will update neighboring IRWM efforts and the way cooperation or coordination with these other efforts will be accomplished. ??? Exhibit A-6 ??? San Jose Creek Watershed Plan is a steelhead-centric, physical watershed assessment that will lead to a prioritized list of watershed management actions. ??? Exhibit A-7 ??? The Cities of Monterey and Pacific Grove are working with the SWRCB to meet discharge requirements and propose to refine an alternatives analysis completed in 2006 with the help of a Prop. 50 planning grant from DWR. ??? Exhibit A-8 ??? Hydrologic Modeling of the Carmel River Alluvial Aquifer will develop a new model to provide the ability to simulate and better manage the interaction between stream flow and groundwater movement in the portions of the Carmel River. DISADVANTAGED COMMUNITY INVOLVEMENT General stakeholder outreach will be augmented with actions including: - DAC information will be updated using 2010 census information. - A consultant or local community group, such as the Ford Ord Environmental Network, may be retained to better identify DACs, explain the benefits of the IRWM grant program, and connect leaders or representatives in DACs with the IRWM Plan update. Contact could involve web postings, contact of agency officials, and contacts with other groups involved with underprivileged portions of the community. - Technical assistance may be provided to identify needs, problems, issues and potential solutions or projects to address those needs. - Individual representatives from DACs will be encouraged to become involved in the IRWM stakeholder group and help shape the IRWM Plan update. - Stakeholder members will be encouraged to advocate and represent the interests of those DACs which may lie within a stakeholder???s jurisdiction or area of special interest.
